01 / summary

Analytics professional with a Master's in Data Science and 3+ years across BI and data engineering. Builds governed pipelines in dbt, BigQuery, and GCP, then turns them into Power BI and SQL reporting leadership acts on.

02 / experience

May 2025 - Dec 2025

Data analytics & computer vision capstone

Nissha Medical Technologies · Buffalo, NY

- Designed automated testing routines in Python with pandas and NumPy, lowering manual production review effort by 35% across validation phases.
- Investigated 4,500+ manufacturing logs through EDA and statistical analysis, raising variance tracking consistency by 27%.
- Engineered anomaly-filtering logic with feature engineering and model checks, removing recurring calculation faults.
- Implemented monitoring triggers on yield variables, shortening factory inspection cycles by 31% through real-time streaming.
- Validated preprocessing routines under Git version control, decreasing false-positive anomaly flags by 18%.

Python · pandas · NumPy · OpenCV · Git

Mar 2024 - Jul 2024

Data analyst

Constituents AI & Technology · Delhi, India

- Developed 10+ Power BI dashboards with DAX and Power Query, merging marketing and operational clusters and expanding self-service usage by 65%.
- Mined 1.2M+ transaction records via SQL on PostgreSQL, running cohort and retention analysis that lifted conversions by 12%.
- Modeled subscriber shifts through time-series forecasting, lifting quarterly forecast accuracy by 20%.
- Standardized metric definitions and ran A/B testing with segmentation logic, cutting review prep timelines 40% and entry errors 90%.
- Facilitated requirements gathering with stakeholders, aligning raw operational metrics against structured RDBMS schemas.

Power BI · DAX · Power Query · PostgreSQL · SQL

Jan 2024 - Mar 2024

Data analytics & reporting specialist

Google · Mumbai, India

- Consolidated reporting assets in Power BI and Excel across 10+ business units, shrinking manual spreadsheet work by 40%.
- Structured executive-facing KPI views, unifying fragmented metrics into one reporting layer for weekly leadership visibility.
- Built recurring DAX measures automating variance calculations, keeping figures aligned with upstream source systems.
- Delivered monthly demand patterns via regression projection models, holding forecast variation within +6%.

Power BI · DAX · Excel

Jan 2023 - Dec 2023

Data operations analyst

Google · Mumbai, India

- Audited GCP ETL/ELT pipelines orchestrated in Airflow, adjusting validation rules to reduce load exceptions by 28%.
- Optimized BigQuery and Spark transformation jobs feeding reporting, tuning query logic to stabilize daily production loads.
- Automated reconciliation checks enforcing data quality and governance, flagging schema drift early during platform transitions.
- Translated raw feeds into governed warehouse tables using dimensional modeling, documenting lineage back to validated sources.

GCP · BigQuery · Airflow · Spark · dbt

Jun 2022 – Dec 2022

Report analyst

Google · Mumbai, India

- Isolated integrity failures with custom SQL cleansing scripts on MySQL, cutting historical reporting gaps by 95%.
- Analyzed monthly reconciliation between engineers and finance leads, improving reporting package clarity by 35%.
- Produced standardized reporting packages giving stakeholders consistent month-over-month figures across business units.

SQL · MySQL · Excel

03 / education

Aug 2024 – Dec 2025

MPS, Data Science & Applications

State University of New York at Buffalo · Buffalo, NY · GPA 3.5

04 / selected projects

Aug 2026 - present

NYC subway reliability pipeline

The MTA never records when a train actually arrives. This pipeline infers it.

Python · BiqQuery · dbt · GCP

Jan 2025

Bank marketing strategy

43,193 telemarketing calls, normalised to 3NF, three classifiers — and a dashboard you can actually drive.

Python · scikit-learn · SQLite · Dash · Plotly

Aug 2025 – Dec 2025	AI print inspection system Defect detection on high-speed print lines, 69% → 95% mAP. OpenCV · YOLOv8 · Python
Jan 2025 – Feb 2025	Customer churn prediction 87% test accuracy on 10K telecom records, surfaced in Power BI. Python · scikit-learn · Random Forest · Power BI
Jan 2025 – Feb 2025	Real-time fake news detector TF-IDF and ensemble models at 91% precision, streamed to a live dashboard. spaCy · TF-IDF · SVM · Logistic Regression
Jan 2025 – Feb 2025	Marketing campaign segmentation 75K customer records segmented; found the cohort running 19% below ROI. R · rpart · dplyr · Power BI
Aug 2022 – Dec 2022	Mineral mapping and classification Remote sensing plus ML for mineral exploration. Paper under review. CNN · Random Forest · Remote sensing

05 / capabilities

Languages & BI SQL · Python (pandas, NumPy, scikit-learn) · R · Power BI · Tableau · DAX · Power Query · Excel · Git	Statistics & ML Regression · Time-series forecasting · A/B testing · Cohort & retention · Segmentation · Feature engineering · EDA · MLOps
Data engineering ETL/ELT · dbt · Airflow · Spark · Star-schema modeling · Warehousing · Cleansing · Validation · Governance	Platforms & AI BigQuery · Snowflake · GCP/AWS/Azure · PostgreSQL/MySQL/SQL Server · LLMs · RAG · Prompt engineering · Vector DBs

06 / certifications

Google · Coursera · Crash Course on Python

Google · Coursera · Using Python to Interact with the Operating System

Google · Coursera · Introduction to Git and GitHub

Google · Coursera · Troubleshooting and Debugging Techniques

Google · Coursera · Configuration Management and the Cloud

Vanderbilt · Introduction to Programming with MATLAB
